Job description of Laboratory technician

1. To collect and transport samples from OPD/field and perform various tests for STIs, as outlined.
2. To facilitate patient/sample referral and sample processing at the centre.
3. To maintain relevant laboratory records and prepare monthly reports and also maintain records of stock/supplies and investigations.
4. To ensure timely indents for chemicals, reagents and other necessary items.
5. To ensure proper and safe storage of materials received.
6. To maintain equipment and glassware in serviceable condition and in case any repair or maintenance is needed, to inform MO/In-charge well in time.
7. To efficiently organize laboratory services to reduce waiting time for patients and avoid sample exchange.
8. To maintain cleanliness in the laboratory premises and follow recommended safety procedures during all processes.
9. To strictly adhere to hospital and Biomedical waste management guidelines.
10. To maintain necessary records of investigations done and prepare and submit monthly/weekly/daily reports to MO/In-charge well in time.
11. To adhere to internal and external quality procedures and NABL Accreditation processes.
12. Undertake STI/RTI testing according to standard laboratory procedures. Draw blood for Syphilis/HIV and other tests.
13. Assist doctor in collection of vaginal, cervical, urethral, oral or rectal samples.
14. Maintain patient records and laboratory registers.
15. Procure and maintain laboratory supplies.
16. Submit monthly reports to NACO/DSACS in the prescribed formats.
17. Help Technical Officer to prepare SOPs and documents for Accreditation processes.
18. Enter data in SIMS/any other portal as developed by NACO for result reporting.
19. To follow any other additional work relating to STI/RTI program assigned by the nodal officer.
